Summary

I am an ex-automotive engineer with 2,5 years experience designing race truck parts and units. I also have 3 years experience in the Graphic Design industry as a freelancer. I make not only design, but a technical side also. I want to try myself in the web and app design field.

Experience

Engineer | GAZ Raid Sport at Gorky Automobile Plant, Nizhny Novgorod · 2019—2021
- Configured suspension parts: shocks, bump-stops, sway bars and designed mounts for it.
- Designed suspension parts: leaf spring top and bottom plates.
- Designed a cargo box for rally raid truck.
- Drew up a technical task for a tarp box of the assistance truck.

Graphic Designer | Freelance · 2018 – present
- Designed layout and visual style of web-site for the gift shop. · Romanovandety
- Redesigned the mobile app for Android users. · Beer Insiders
- Designed UX flow, layout and visual style for the digital library. · NDA
- Designed layout and data visualization of the half year report · Sravni.ru

Frontend developer · 2020—present
- Made an MVP of textelyator (in Russian) — a website that helps to create new ideas by denial, insert emojis to imitate SMM texts and insert swear words.
- My portfolio: verymoko.github.io
